### Top 10 visiting countries

## Sectors at Andina Pack 2021

## What our exhibitors have to say

"We have always been participating in Andina Pack with our local representative in Colombia, but for 2019 we decided to come with our company from Spain, Teixpac Latam, since Colombia, after Brazil, has become the second largest market of interest for our company in the region."

Spanish representative of Teixpac, Italy.

"In an agreement with APEX (Promotion, Investment and Export Agency of the Brazilian government) and ABIMAQ to promote and increase Brazilian exports of machinery and equipment, for the past 10 years we have been working together to become a strong commercial partner in Colombia. For this reason we have participated in Andina Pack consecutively for the fifth time, becoming the ideal platform for our exhibitors to promote their products and services."

Representative of ABIMAQ, Brazil.

## Why Exhibit

Andina Pack is the most important trade show in the region focused on the production, processing, packaging and handling technologies of Food & Beverages as well as Pharmaceuticals. It addresses owners and executives from both production and commercial enterprises.

Andina Pack attracts industry experts from all sectors of the food and beverage manufacturing and packaging industries including owners, plant managers, quality control supervisors, R&D managers, engineers, logistic managers, procurement support and more.

Powered by Anuga, Andina Pack offers every kind of processing and packaging technology in two main industries: Food and Beverage and Pharma and Cosmetics.

In addition to the large global companies, exhibitors meet decision makers from small and medium-sized processing and packaging companies who can't be reached on typical sales visits.

Andina Pack transcends market sectors to serve cutting edge technologies and innovative solutions seen nowhere else.

Colombia is the third largest economy in Latin America and the Bogotá-region is the main food and beverage market and production center in Colombia, accounting for 45% of total industry sales in the country and home to 39 of the top 100 leading companies in the sector.

Colombia's geographical location allows for privileged logistic procedures between countries becoming the hub of Latin America and providing a strategical advantage to all companies interested in penetrating the Andean Region market.
